2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

Present teaching for M.Sc Biochemistry students' 1st and 2nd-year students. The classroom atmosphere is mainly the sole responsibility of the instructor/mentor to create an environment where my students are

encouraged and comfortable in expressing their ideas, and opinions and not hesitant or tentative about disagreeing with either myself or other students. This engagement is much more than simply being entertaining, but first and foremost it is based on experiential learning as the main goal in the classroom. I want people to think outside of their normal boundaries and paradigms they have created or been "held" within. I feel it's my responsibility to convey my passion and excitement about the material in the class, about academia, about life outside the classroom, and to make the material relevant to past and present experiences. I believe in teaching information systems that students "learn by doing". An information system is a much-applied subject matter. My classes are filled with "hands-on projects/training" encouraging and participating in and presenting National and International Seminars/workshops/symposiums, and interacting with reputed scientists worldwide. M.Sc Biochemistry.
